Account Settlement

Count, Submit, Verify, Handover

DOCUMENT 02 OF 14

Report Name / Screen:* Account Settlement

Seedha faisla:* Existing form sahi base hai; 2-step physical handover and approval enforce karein.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 3
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 4
9. Doosri reports se cross-check 5
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 5
13. Final developer instruction 6

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- Expected Cash, Counted Cash, Retained Float, Handover aur History ka layout useful hai.
- Settlement History par period, status, search aur exports rakhain.

2. Kya add / change / verify karna hai

- Settlement ID, branch/user/shift, Submitted By/At, Receiver, Reviewed/Accepted By/At.
- Counted vs expected difference aur mandatory reason agar variance configured limit se zyada ho.
- Retained Float optional rakhein kyun ke carry forward required hai; isay petty cash se confuse na karein.
- Partial acceptance, rejected / returned, pending, accepted, cancelled-by-authority statuses.
- Exactly one posted custody transfer per acceptance; pending ya rejected se cash ledger deduct nahi.
- Receiver ki side par linked cash-in entry aur same settlement reference.
- Full or partial handover, repeat settlement only against remaining eligible custody; clear cut-off snapshot and idempotency key.
- Cash physically received must be reconciled to accepted amount; shortage/surplus exception recorded separately (do not silently expense).

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Sender expected cash	My Cash Balance Sheet ki same shift, user, as-of-snapshot.
Physical count	Sender input + approved re-count audit.
Review and approval	Authorized Admin/Super Admin/receiver user account with separate identity.
Ledger posting	Accepted settlement creates paired sender/receiver cash custody entries.

4. Required fields aur top filters

Table fields:* Settlement # | Shift | Sender | Receiver | Expected | Counted | Variance | Retained | Submitted | Accepted | Status | Submitted / Reviewed By

Top filters:* Branch | Sender | Receiver | Date | Status | Shift | Variance Only

5. Sahi accounting formulas

Variance

Counted Cash - Expected Cash at submission snapshot.

Proposed Handover

Counted Cash - Retained Float (must be >= 0).

Accepted Handover

Actually verified and approved amount <= proposed handover; short acceptance difference recorded.

Sender Closing / Carry

Cash remaining after actual accepted handover and any approved variance resolution; never silently write off difference.

Receiver Cash In

Same Accepted Handover receiver ke cash ledger mein Debit (cash-in) create kare; sender ledger mein Credit (cash-out).

Carry Forward After Acceptance

Sender posted cash balance at settlement cut-off - accepted handover + authorized post-cutoff movements; Next Shift Opening = accepted prior closing snapshot, exactly once.

6. Step-by-step transaction flow

- 1. Sender cash count karke settlement draft prepare kare.
- 2. System expected, counted, variance aur proposed handover calculate kare.
- 3. Submit par immutable request Pending ho aur proposed cash handover lock/flag ho.
- 4. Receiver physically cash count aur verify kare; user cannot approve own submission.
- 5. Accept par linked sender credit and receiver debit ek atomic transaction mein create hon.
- 6. Reject/return ya partial accept par reason, audit events aur remaining ownership clearly update ho.
- 7. Retained closing next shift opening banayen; same shift double settlement prevent.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Settlement submission 800	No posted cash-out	Pending approval only
Settlement accepted 800	Sender custody Credit 800	Receiver custody Debit 800
Rejected settlement	No movement	Keep audit trail + reason

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Expected Cash	8,500
Counted Cash	8,500
Variance	0
Retained Float	500

Example Item	Amount / Result
Proposed Handover	8,000
Accepted Handover	8,000
Sender Carry Forward	500
Receiver Cash In	8,000

9. Doosri reports se cross-check

- Pending amount posted settlement total mein count nahi hoga.
- Accepted amount sender/out and receiver/in same reference ke saath exact match.
- No settlement as income, expense, sales ya operating profit.
- Cash vault aur user custody all-users total before/after same rahe.
- Partial acceptance ki remainder state separately auditable ho.

10. Portal access aur security

Accountant can submit own only. Admin reviews branch cashier; Super Admin company scope. Admin ka own settlement independent approved receiver review kare. No self approval.

11. Developer tests - kab sahi mana jaye

- Test 1: Counted 8,200 vs Expected 8,500 -> -300 shortage reason required.
- Test 2: Retained 500, Counted 8,500 -> proposed 8,000.
- Test 3: Pending 8,000 -> no posted cash movement.
- Test 4: Accept request twice -> only one paired 8,000 transfer.
- Test 5: Receiver partial 7,800 -> 200 discrepancy workflow, no silent write-off.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
