Income & Expense Report

Recognized Income, Expense and Cash Flow

DOCUMENT 03 OF 14

Report Name / Screen:* Income & Expense

Seedha faisla:* Table/filter useful. Revenue vs received cash aur earned vs paid expenses ko clear alag rakhein.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 3
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 4
9. Doosri reports se cross-check 5
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 5
13. Final developer instruction 6

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- User/branch/date filters, type/source/status, total table useful hain.
- Sales aur commission events ko visible rakhna achha hai.

2. Kya add / change / verify karna hai

- "Revenue" aur "Cash Collection" ko alag subtotal/report view rakhein.
- Commission earned (accrued) aur commission paid ko alag fields; payroll expense vs salary paid separate.
- Tax, tips, customer advances, supplier principal payments aur internal transfers income/expense nahi.
- Invoice refunds and reversals as linked contra revenue; report must preserve originals.
- Today + Custom presets, posted date vs cash received date clarity.
- State clearly whether top summary is recognized income/expense OR received/paid cash; do not label cash collection as revenue.
- Recognized income and expense register is the default; cash-flow figure shown separately, not added to net operating profit.

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Operating revenue	Valid posted/performed service, package and retail invoice lines net of discount and valid reversals; exclude tax/tips.
Operating expenses	Approved posted operating expense vouchers, earned commissions, finalized payroll expense, inventory COGS and consumption per policy.
Actual cash paid / received	POS posted cash and bank receipts; cash/bank paid expenses, salary, commission payouts.
Contra adjustments	Linked refunds, reversals, approved correction records.

4. Required fields aur top filters

Table fields:* Date | Type | Source | Branch | Actor | Title | Recognized Amount | Paid/Received | Status | Reference | Method

Top filters:* Period | Branch | User | Income/Expense | Source | Status | Accrual/Cash View

5. Sahi accounting formulas

Net Revenue

Posted service/package/product gross - valid discounts - refunded/reversed net lines (excluding tax and tips).

Recognized Expense

Operating vouchers incurred + earned commission + finalized salary costs + COGS/consumption + approved write-offs (without duplicates).

Operating Surplus

Net Revenue - Recognized Expense (for matching period/basis).

Cash Flow (operating)

Operating cash receipts - operating cash payments; excludes internal cash transfers, and is NOT operating profit.

Cash Collected

Sum actually received tendered payments; split payments counted by component exactly once.

Expense paid vs accrued

Posted Recognized Cost - Valid Payouts - Authorized Credits = remaining payable where applicable; payout timing does not create a new cost.

No Double Count

Each canonical source posting ID recognized at most once in report; payment of an accrual or internal transfer changes asset/liability only.

6. Step-by-step transaction flow

- 1. Invoice posted/completed -> recognized net revenue, plus separate tax/tips liability.
- 2. Partial payment -> cash/bank collection; unpaid portion receivable, not extra revenue.
- 3. Earned commission -> liability + expense even if unpaid.
- 4. Payment of commission -> liability reduced + bank/cash reduced, expense not repeated.
- 5. Supplier stock purchase -> inventory asset + payable/cash; product sold -> COGS.
- 6. Refund/reversal -> linked contra sale and matched commission/COGS reverse rules.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Sale net 1,000 + tax 100	Customer receivable/cash 1,100	Revenue 1,000 + Tax Payable 100
Commission earned 100	Commission Expense 100	Commission Payable 100
Commission paid 100	Commission Payable -100	Cash/Bank -100 (not new expense)

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Posted Net Sales	1,000

Example Item	Amount / Result
Earned Commission Expense	- 100
Other Operating Expense	- 200
COGS	- 100
Recognized Operating Surplus	600
Actual Customer Cash Paid	800
Customer Receivable	200

9. Doosri reports se cross-check

- Net revenue = Sales & Invoices net recognized sales.
- Accrued commission = Commission Report earned net; paid tracked separately.
- Cash receipts = Payment Accounts + Cash Drawer receipt postings; no double count.
- Operating surplus equals Operating Profit statement for same period and scope, when same expense classes included.

10. Portal access aur security

Super Admin authorized all branches/users, Admin branch all users, Accountant own cash performance with financial data rights scoped; Staff only specifically allowed summaries.

11. Developer tests - kab sahi mana jaye

- Test 1: Invoice net 1,000, paid 600 => income 1,000 and cash 600.
- Test 2: Commission earned 100 unpaid => expense 100, cash-out 0.
- Test 3: Cash settlement 400 => income 0, expense 0.
- Test 4: Tax 150 / tip 100 => neither operating revenue.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
