# Tax Management Report

Invoice Tax, Refunds and Tax Payable

**DOCUMENT 04 OF 14**

Report Name / Screen:* Tax Management

Seedha faisla:* Service Breakdown, Service Summary aur Invoice Summary useful; tax liability and tax remittance show karna hai.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

# Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 3
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 4
9. Doosri reports se cross-check 4
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 5
13. Final developer instruction 5

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

## 1. Pehle se kya sahi hai

- Service-wise/invoice-wise tabs, tax base, tax rate aur tax collected columns sahi hain.
- Branch, date aur search filters useful hain.

## 2. Kya add / change / verify karna hai

- Tax code/jurisdiction, inclusive/exclusive, exempt status and historical rate snapshot.
- Gross billed tax, reversed/refunded tax, net tax billed, tax receipts aur remitted tax alag.
- Opening tax payable / closing tax payable; rates manually editable but approved settings only.
- Tax may differ by service/item and law; unverified fixed PST/SST rule hardcode na karein.
- Cash receipt vs tax billed distinction aur source invoice trace.

## 3. Data kahan se aaye ga

| Source module / event | Rule - kya read karna hai |
|---|---|
| Taxable invoice lines | Posted service/product lines with tax policy and discounted base snapshot. |
| Tax reversals | Linked refund/void credit notes for same tax base and historical rate. |
| Tax payment to authority | Authorized tax remittance and payable-adjustment transactions, if workflow implemented. |

## 4. Required fields aur top filters

Table fields:* Date | Invoice # | Service / Product | Branch | Tax Code | Taxable Base | Rate % | Tax Billed | Tax Refunded | Net Tax | Actor

Top filters:* Date | Branch | Tax Type | Service / Item | Invoice | Staff | Tax Status

## 5. Sahi accounting formulas

### Taxable Base (exclusive tax)

Tax-applicable line gross - eligible discounts; exemptions excluded.

### Exclusive Tax

Taxable Base × tax rate snapshot.

### Inclusive Tax Component

Tax-inclusive value × rate / (100 + rate), when rate in percent.

### Net Billed Tax

Gross Billed Tax - Tax Refunds / Valid Reversals.

### Closing Tax Payable

Opening Tax Payable + Net Billed Tax +/- approved tax adjustments - Tax Remitted (subject to recognized-policy timing).

## 6. Step-by-step transaction flow

- 1. Settings mein authorized tax rates and applicability define ho.
- 2. POS invoice line par tax base/rate snapshot save ho.
- 3. Posted invoice tax payable create kare (income nahi).
- 4. Refund linked tax component reverse kare.
- 5. Tax payment to authority posted cash/bank out plus tax payable reduction ho.

## 7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

| Event | First impact | Second impact |
|---|---|---|
| Invoice tax 100 billed | Customer due increases 100 | Tax payable +100 |
| Tax remittance 80 | Tax payable -80 | Cash/bank -80 |
| Tax credit note -20 | Tax payable -20 | Receivable/refund corrected |

## 8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

| Example Item | Amount / Result |
|---|---|
| Line Gross Before Discount | 1,000 |
| Eligible Discount | - 100 |
| Taxable Base | 900 |
| Tax Rate | 10% |
| Tax Billed (exclusive) | 90 |
| Invoice Net Before Tip | 990 |

## 9. Doosri reports se cross-check

- Invoice summed tax = Tax Report gross billed on identical scope.
- Refunded tax = related credit/refund references.
- Tax billed != automatically tax collected; track timing separately.
- Tax excluded from commission and P&L revenue/operating profit.

## 10. Portal access aur security

Tax policy changes Admin/Super Admin only. Front desk view as authorized; Accountant sees collection detail but cannot edit tax posted snapshot.

## 11. Developer tests - kab sahi mana jaye

- Test 1: 10% of discounted base 900 -> tax 90.
- Test 2: Tax-inclusive 1,100 with 10% -> base 1,000 tax 100.
- Test 3: Refund half eligible base -> tax refund 45.
- Test 4: Tax 90 does not increase net sales/commission.

## 12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

## 13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
