Sales & Invoices Report

POS, Discounts, Lifecycle and Receivables

DOCUMENT 05 OF 14

Report Name / Screen:* Sales & Invoices

Seedha faisla:* Visible fields strong; payments, outstanding, split tender and reversals need fully traceable columns.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 3
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 4
9. Doosri reports se cross-check 5
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 5
13. Final developer instruction 5

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- Invoice, date, client, cashier, status, lifecycle, gross, discount, net sales, tax, tip sahi.
- Admin consolidated user filter useful hai.

2. Kya add / change / verify karna hai

- Invoice Total, Cash Paid, Bank/Online Paid, Total Paid, Outstanding, Refund Paid, Customer Advance Applied.
- Partial paid, unpaid, voided, fully/partially refunded states; lifecycle and payment status separate.
- Item/service/package details, staff allocated lines and tax/tip line breakdown drill-down.
- Payment receipt created by user vs Sold By; linked drawer/account per tender.
- Export shows selected statuses and correct totals without treating tips as sales.

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Invoice header/lines	Canonical posted POS invoice and locked snapshots: prices, discount, tax, tip, lines.
Payment records	Cash/card/online split tender receipts, collector and settlement account.
Refund/void records	Approved linked contra invoice/reversal and refund payments.
Service attribution	Staff allocations for service/package components at posting.

4. Required fields aur top filters

Table fields:* Invoice # | Date | Branch | Customer | Sold By | Net Sales | Tax | Tip | Invoice Total | Cash Paid | Online Paid | Outstanding | Status | Lifecycle

Top filters:* Date preset | Branch | Cashier / Sold By | Collected By | Payment Status | Lifecycle | Payment Method | Invoice # | Customer

5. Sahi accounting formulas

Net Sales

Posted gross - discounts - refunded/reversed sales value (excl. tax/tip).

Invoice Payable

Net Sales + applicable net tax + tips (and other separately configured charges).

Collected Amount

Sum valid receipt allocations - cash/bank refunds; never sum invoice header and receipts twice.

Outstanding

Invoice Payable - valid net allocated payments - authorized credits; advances applied once.

Staff Attributed Net Sales

Sum allocated net service/package sales from posted line snapshots only; tax/tips excluded.

6. Step-by-step transaction flow

- 1. Cart checkout -> invoice totals; locked staff & tax snapshots.
- 2. Posting -> invoice revenue/receivable and separate tip/tax payables.
- 3. Cash & online split payments -> method-specific payment movement + actual collector.
- 4. Partial/unpaid -> remaining receivable; later receipt reduces outstanding only.
- 5. Void/refund -> linked reversal/credit and proper tender refund; original preserved.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Invoice net 1,000 + tax 100 + tip 50	Customer Due 1,150	Revenue 1,000, liabilities 150
Customer pays 600 cash	Cash Drawer +600	Receivable -600; no new sale
Refund net 200 + tax 20	Revenue reversal -200	Tax payable reversal -20 + refund liability/cash

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Service Gross	1,200
Discount	- 200
Net Sales	1,000
Tax	+ 100
Tip	+ 50
Total Due	1,150
Cash Received	600
Online Received	300
Outstanding	250

9. Doosri reports se cross-check

- Net sales to Income & Expense / Operating Profit (recognition basis).
- Cash/online paid portions to matching custody/payment ledgers.
- Tips due to Staff Tips liability, tax to Tax Management.
- Total attributed sales across all staff equals eligible allocated invoice value (not duplicated).

10. Portal access aur security

Super Admin all, Admin branch all, Accountant branch own sold/collection or assigned as permitted; manager staff scoped by permissions. Invoice detail edit/reversal via source POS authorization only.

11. Developer tests - kab sahi mana jaye

- Test 1: Split 600 cash + 300 online = paid 900 (not 1,800).
- Test 2: Invoice 1,150 paid 900 => 250 outstanding.
- Test 3: Unpaid invoice recognized income but cash zero.
- Test 4: Partial refund linked status preserved and tax/tip corrected.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
