Debit / Credit Statement

Cash Drawer + Named Bank / Online Accounts (Two Ledgers, One Report)

DOCUMENT 06 OF 14

Report Name / Screen:* Reporting > Debit / Credit Statement (Tabs: Cash Drawer / Payment Accounts)

Seedha faisla:* One report rakhain, magar cash aur named noncash accounts ko mix na karein. Dono asset-ledgers mein Debit=In, Credit=Out.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 4
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 5
9. Doosri reports se cross-check 5
10. Portal access aur security 6
11. Developer tests - kab sahi mana jaye 6
12. Saari reports par same accounting rules 6
13. Final developer instruction 6

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- Payment Accounts screen par date, account, source aur transaction reference ke fields useful hain.
- Cash Drawer Logs par custodian, shift date, status, opening float aur expected cash useful hain.
- Branch/date/export filters aur linked source records useful hain.

2. Kya add / change / verify karna hai

- Top Account Type filter: All / Cash Drawer / Bank / Card Clearing / Online Wallet; Payment Method filter Cash/Card/Bank/Online; Account / Drawer, Branch, User, Date, Source, Direction.
- Statement tab columns: Date/Time, Account/Drawer, Branch, Actor, Source, Reference, Method, Debit (In), Credit (Out), Running Balance, Status.
- Account opening balance = same account ka period start se pehle balance; combined accounts ke liye ek artificial running balance na show karein.
- Cash Drawer ka Shift Reconciliation tab alag rahay: Opening, Cash In, Cash Out, Expected, Counted, Variance, Settlement/Carry, Status.
- Card terminal receipt clearing account mein pehle aata ho to card clearing ko bank deposit ke waqt transfer karein; dono balances mein revenue dobara add nahi hoga.
- Accepted account-to-account transfer paired out/in entries ho, status verified, no new income/expense; reversed/failed entries exclude from closing.
- Named bank/online account asset debit/credit salon ledger perspective se; supplier AP ledger ki debit/credit sign convention alag ho sakti hai.

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Cash Drawer transaction ledger	POS actual CASH receipts, tips received/paid, cash refunds, cash expenses, actual salary/commission payouts, accepted custody transfers and prior carried opening.
Named payment account ledger	Verified BANK/ONLINE/Wallet receipts, card clearing settlements, account payouts, authorized transfers, opening setup/adjustments.
Source identity / actor	Source invoice, voucher, salary, commission or approved settlement ref + actual performed/collected/paid user.
Shift cash count	Drawer shifts, counted cash, variance and accepted settlement status as separate control records.

4. Required fields aur top filters

Table fields:* Date/Time | Account/Drawer | Account Type | Branch | Method | Source | Reference | Actual User | Debit/In | Credit/Out | Running Balance | Status

Top filters:* Account Type | Payment Method | Named Account/Drawer | Branch | Cash Custodian (scoped) | Date Range | Source | Debit/Credit | Posted/Reverse

Cash Drawer tab mein user + shift* mandatory; Named Online/Bank tab mein specific named account* mandatory. Method filter account type ko change nahi karta.

5. Sahi accounting formulas

Per-account Opening

Opening Balance before From-Date = authorized opening setup + all preceding posted Debits - all preceding posted Credits.

Running Balance

Account Opening + cumulative Posted Debits (In) - cumulative Posted Credits (Out), within that one account/drawer.

Per-account Closing

Opening Balance + Period Debit Total - Period Credit Total.

Cash Drawer Expected

Shift Opening + Cash Receipt Debits + Tips Cash In + Accepted Cash Transfer In - Cash Expense/Refund/Tip Payout Credits - Accepted Transfers Out.

Cash Drawer Variance

Physically Counted Cash - Expected Cash at same shift snapshot.

Branch Cash Position

Sum closing balances of all branch cashier drawers + authorized vault (asset-internal transfers net zero).

Named Noncash Position

Sum closing balances of distinct bank/wallet/clearing asset accounts; do not double-count card clearing and destination bank after posting transfer.

6. Step-by-step transaction flow

- 1. Select branch then Account Type. Filter Cash Drawer to show user and drawer asset-ledger entries, and separate Shift Reconciliation tab.
- 2. Select Bank/Online/Card account to show per-account opening, Debit(In), Credit(Out), running balance and closing.
- 3. Tender posted -> actual method decides which account is debited; revenue recognized independently at invoice posting.
- 4. Cash spent/payout -> specific cash drawer credited; bank-paid item -> named account credited.
- 5. Settlement accepted -> source drawer Credit and receiver drawer/vault Debit paired; transfer not revenue/expense.
- 6. Card clearing -> bank deposit transfer moves between named accounts once, fees as separate recognized expense and payment movement.
- 7. Export under selected method/account/scope with one consistent as-of and actor metadata.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Named bank sale receipt 1,000	Bank Debit 1,000	Recognized sales unaffected by receipt timing
Paid expense 200 via bank	Bank Credit 200	Expense payable reduces, or direct expense if incurred now
Cash settlement accepted 400	Sender Drawer Credit 400	Receiver Vault Debit 400

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Bank Account Opening	2,000
Online Sale Receipt	Debit +1,500
Bank-paid Expense	Credit -400
Account Transfer to Wallet	Credit -600
Bank Account Closing	2,500
Wallet Transfer-In	Debit +600
Cash Drawer Opening	1,000
Cash Sale	Debit +800
Accepted Cash Handover	Credit -1,200
Cash Drawer Closing	600

9. Doosri reports se cross-check

- Named account totals reconcile with source tender allocations and confirmed bank/clearing movement data.
- Cash drawer totals reconcile with My Cash Balance Sheet by same drawer, shift, user and period.
- Accepted custody handover sender Credit = receiver Debit with same transfer ID; combined branch physical cash unchanged.
- Report debit-credit totals and exported CSV/PDF equal screen totals and opening/closing formulas.
- Cash Drawer Count/Variance does not modify posted cash balance unless a separate approved adjustment event is posted.

10. Portal access aur security

Super Admin authorized all branches & named accounts; Admin own branch; Accountant only own cash drawer and explicitly assigned online accounts if policy permits. Opening adjustments and transfers require specific permissions.

11. Developer tests - kab sahi mana jaye

- Test 1: Opening bank 2,000, debit 1,500, credit 400 and 600 -> closing 2,500.
- Test 2: Cash opening 1,000 +800 -1,200=600; no invoice counted twice.
- Test 3: All Accounts filter groups subtotals by account; no combined running balance.
- Test 4: Pending settlement does not reduce sender statement; Accepted transfer posts paired movement once.
- Test 5: Drawer counted 580 expected 600 => variance -20 but ledger remains 600 pending variance resolution.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
