iSysware | SalonOS

Detailed Income Report

Every recognized income line + linked receipt status | no duplicate collections

DOCUMENT 07 OF 14

Report Name / Screen:* Reporting > Detailed Income Report

Seedha faisla:* Detailed Income naya transaction-level recognized sales breakdown ho. Revenue, tax, tips aur received payments alag columns.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 4
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 5
9. Doosri reports se cross-check 5
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 6
13. Final developer instruction 6

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- Existing Sales & Invoices ka invoice/source reference, customer, staff, category aur date data reuse ho sakta hai.
- Current Income & Expense mein source/user/branch/status field model already appropriate hai.

2. Kya add / change / verify karna hai

- Each invoice line/service/package component/product ke liye recognized net revenue trace; direct line IDs, invoice IDs and refund refs.
- Gross, allocated line discount, net recognized income, associated billed tax, tips (liability), received cash/noncash and receivable alag.
- Source categories: Service Sale, Package Sale, Retail Product Sale, Revenue Refund / Reversal; optional Other Operating Income only if genuine documented posting source exists.
- Payment register separate expandable detail: one invoice may have many receipt allocations; invoice net income ko payment par dubara income na count karein.
- Service/package staff attribution without duplicating invoice recognized revenue.
- Recognized date/payout date columns; refunded invoice ko linked reversal row se net down karein; approved status and actor show.
- Supplier loan principal, capital introduction, cash transfer, advance deposit, tax, tips, credit collection and settlement are NOT automatically income.

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Posted POS invoice lines	Valid bill line IDs, service/package/retail category, posting/performance timestamp, branch, unit price, discount and net amounts.
Refund/credit note	Linked invoice/line reversal events; net revenue reduced once.
Invoice receipt allocations	Cash, card, online actual settlements linked to invoices; used for Paid/Outstanding and not new income.
Staff allocations	Assigned staff/service completion and commissions; only attribution not duplicate revenue.
Optional other income	Posted approved other-operating-income event only if supported and appropriately classified.

4. Required fields aur top filters

Table fields:* Recognition Date | Invoice & Line # | Branch | Income Source | Client | Service/Product | Gross | Discount | Net Income | Tax (separate) | Tip (separate) | Received | Outstanding | Created By

Top filters:* Branch | Recognition Date | Income Source | Service/Product | Invoice # | Client | Staff/Attributed | Invoice Lifecycle | Search

5. Sahi accounting formulas

Recognized Line Net

Valid Line Gross - Allocated Line Discount - Net Revenue Reversal / Refund for that line.

Total Detailed Income

Sum valid recognized service net + package net + retail product net + recognized other operating income (if configured), minus net revenue refunds; no tax or tips.

Invoice Receivable

Invoice Gross Due Including Applicable Tax/Tip - valid applied customer payments - approved credits, with tip liability kept separate.

Collection for Period

Sum actual verified receipt allocations with receipt timestamp inside selected payment period; not added to recognized income.

Service Attribution

Sum staff allocated net line portions = eligible service/package line net; attribution total is not additional business income.

Source Share %

Selected source Net Income / Total Recognized Income x 100; if total zero show N/A.

6. Step-by-step transaction flow

- 1. Invoice line posted and revenue recognition condition met -> ONE recognized income source event.
- 2. Discount allocated to that line before computing taxable base and commission basis per policy.
- 3. Cash/online payment creates receipt and asset movement; income row shows paid status but no second revenue event.
- 4. Unpaid part tracked as customer receivable; cash receipts reduce receivable.
- 5. Valid refund/void creates linked contra-income row and any commission/cost reversal.
- 6. Category/service/staff subtotals rolled up; Detailed Income total ties to P&L Net Revenue, not all collections.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Service gross 1,000 / discount 100	Net Income +900	Tax / tip tracked separately
Cash collection 400	Cash Drawer +400	Receivable -400, income unchanged
Valid refund net 200	Detailed Income contra -200	Cash/bank out or customer due credit

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Service Gross	1,000
Service Discount	-100
Service Net Income	900
Retail Product Net Income	+400
Recognized Income	1,300
Tax on invoice	+130 (liability)
Tip on invoice	+70 (liability)
Cash Collected	800
Receivable Remaining	700

9. Doosri reports se cross-check

- Detailed Income service/package/retail subtotal = same date and branch P&L Revenue lines.
- Sales & Invoice report Gross/Discount/Net totals and recognized lines align (with agreed timing rules).
- Collected Cash/Online receipts equal named account/cash drawer receipts; receipts are not another income line.
- Refund net value simultaneously affects P&L and commission/attribution as appropriate.

10. Portal access aur security

Super Admin cross-branch as permitted; Admin own branch; Accountant only scoped invoice income/receipt detail. Employee can view own attributed lines only if granted.

11. Developer tests - kab sahi mana jaye

- Test 1: Invoice line gross 1,000 less 100 discount -> recognized 900, customer pays 300 now -> income 900, receipt 300, outstanding based on invoice due.
- Test 2: Invoice tax 130 tip 70 -> neither increases 1,300 income.
- Test 3: Refund 200 posted later -> new contra-income -200 (original invoice retained).
- Test 4: Paying old customer debt 500 this month -> current-month income unchanged.
- Test 5: Staff split 60/40 service -> one 900 revenue, not 1,800.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
