iSysware | SalonOS

Inventory Reports

Six Tabs: Valuation, Movements, Purchases, Ledger, Usage, Expiry

DOCUMENT 12 OF 14

Report Name / Screen:* Inventory Reports

Seedha faisla:* Six-tab structure strong; COGS, expiry, payable and movement cost snapshots reconcile karein.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 3
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 4
9. Doosri reports se cross-check 5
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 5
13. Final developer instruction 5

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- Valuation & Layers, Movement Trail, Purchases, Supplier Ledger, Salon Usage, Expiry & Risk sab useful hain.
- Item, category, branch, date, search aur export useful.

2. Kya add / change / verify karna hai

- Valuation is as-of stock balance, while movement/purchases are date-range flows.
- Batch landed unit cost snapshots, cost layer, FEFO, expiry/quarantine enforcement.
- Stock purchases expense nahi; sale par COGS, consumption par salon material cost.
- Supplier payment reduces payable; isay COGS/expense dobara nahi banayein.
- Stock take difference approved adjustment only; no direct quantity edit.
- Inter-branch transfers linked OUT/IN at historical cost; returns/reversals linked.

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Item & batch masters	Item SKU, item type, category, batch/expiry and cost layer.
Stock movement ledger	Posted stock in/out, POS sale out, salon consumption, returns, adjustments, transfers.
Purchase and supplier	Posted PO/invoice, payments, supplier credits, running payable.
POS retail sales	Retail item sale lines with actual stock COGS movement cost.

4. Required fields aur top filters

Table fields:* Valuation: SKU/Batch, Qty, Cost Layer, Cost Value | Movements: Date, Type, Ref, In/Out, Cost, Actor | Purchases: Supplier, PO, Net, Paid, Due | Supplier: Debit Payment, Credit Purchase, Balance | Usage: Qty, Unit Cost, Total Cost, Service | Expiry: Batch, Days, Cost at Risk

Top filters:* Branch | Date (flow tabs) | As-of Date (valuation) | Category | Item Type | Supplier | SKU/Batch | Movement Type

Six existing tabs preserved:* Valuation & Layers, Movement Trail, Purchases, Supplier Ledger, Salon Usage, Expiry & Risk.

5. Sahi accounting formulas

On-Hand Qty

Opening Qty + posted In Qty - posted Out Qty (after authorized returns/adjustments).

Inventory Cost Value

Sum remaining valid cost layer quantities × historical landed cost each layer.

Retail Product COGS

Sum posted POS stock OUT qty × actual consumed layer landed unit cost.

Salon Material Consumption

Sum authorized salon consumption stock OUT qty × historical layer unit cost.

Supplier Payable

Opening Payable + Credit Purchases - Supplier Payments - Supplier Returns/Credits +/- approved adjustments.

Expiry Cost at Risk

At-risk remaining batch qty × actual cost per layer; risk != automatic write-off expense.

6. Step-by-step transaction flow

- 1. Stock In purchase: inventory increases; payment method separate; supplier payable if credit.
- 2. Retail item sold: sale revenue and stock COGS/OUT posted exactly once.
- 3. Salon consumable used: stock OUT and salon material consumption cost.
- 4. Supplier paid: payable reduced and cash/bank reduced, not product COGS.
- 5. Return/adjustment transfers posted with original cost snapshots.
- 6. Expiry/quarantine block sale/dispense; approved write-off expense only when posted.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Credit stock purchase 1,000	Inventory Asset +1,000	Supplier Payable +1,000
Stock sold costing 300	COGS +300	Inventory Asset -300
Salon materials used cost 200	Consumption Cost +200	Inventory Asset -200
Supplier paid 600	Supplier Payable -600	Cash/Bank -600 (not fresh cost)

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Purchase: 10 units x PKR 100	Stock Cost +1,000
POS Sale: 3 units	COGS 300
Salon Use: 2 units	Consumption Cost 200
Stock Remaining: 5 units	Cost Value 500

Example Item	Amount / Result
Supplier Paid	600
Supplier Payable if all credit	400

9. Doosri reports se cross-check

- Inventory remaining layers to Stock Overview qty/value.
- Retail COGS and Salon Usage to P&L direct costs.
- Supplier payable to Supplier Ledger; supplier payment to cash/bank movement.
- Purchases not double counted in expenses; branch transfer eliminates consolidated interbranch qty/value gain.

10. Portal access aur security

Admin/Super Admin stock accounting; operations users posting as permission; reporting branch/user scope. Stock adjustments require approved role and full audit.

11. Developer tests - kab sahi mana jaye

- Test 1: 10 purchased -3 sale -2 consume = 5 on hand.
- Test 2: 5 x cost 100 = 500 stock value independent of sell price.
- Test 3: Supplier payment 600 -> payable down 600, COGS unchanged.
- Test 4: Expired/quarantined batch cannot be sold.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
