Operating Profit & P&L Statement

Existing Operating Profit Report - Included for Full Reconciliation

DOCUMENT 14 OF 14

Report Name / Screen:* Existing Operating Profit (screenshot); supplementary to Operating Expense request

Seedha faisla:* Current P&L groups logical. Historical comparison, classification and source-matching verify karein.

Is PDF mein required fields, source se data ka flow, formulas, example amounts, access aur test cases document kiye gaye hain.

Important: Empty records ko fault nahi samjha gaya. Is report mein jo bhi improvement likhi hai woh design/verification requirement hai - screenshot se existing backend ka implementation confirm nahi hota.

Practical accounting blueprint • Roman Urdu • PKR examples only

Index - is PDF ke topics

1. Pehle se kya sahi hai 3
2. Kya add / change / verify karna hai 3
3. Data kahan se aaye ga 3
4. Required fields aur top filters 3
5. Sahi accounting formulas 3
6. Step-by-step transaction flow 4
7. Accounting events - income, expense aur cash alag 4
8. Example - sirf samajhne ke liye 4
9. Doosri reports se cross-check 5
10. Portal access aur security 5
11. Developer tests - kab sahi mana jaye 5
12. Saari reports par same accounting rules 5
13. Final developer instruction 6

Note: Index ke page numbers automatically final PDF ke mutabiq update kiye gaye hain.

1. Pehle se kya sahi hai

- Revenue: service, package, retail, refunds; Cost of Sales; Gross Contribution; Operating Expenses; Operating Profit layout good.
- Current/prior-period and variance columns useful.
- P&L Statement / Detailed Ledger tabs useful.

2. Kya add / change / verify karna hai

- Prior period equivalent comparison same branch/day boundaries; zero prior => growth N/A, not forced 0%.
- Tax and tips not P&L revenue/commission; customer advances and cash transfers not revenue.
- Retail COGS and salon consumables from posted stock movements at historical costs.
- Payroll finalized and net earned commission booked once, regardless payout timing.
- Include approved inventory shrinkage & write-offs; full company financial balance sheet separate future scope.
- Operating Expenses drill-down existing same report ke andar rakhein; additional separate report/menu user scope mein nahi.
- Detailed Income / Detailed Expenses both drill-down into P&L respective lines; no independent second posting layer.

3. Data kahan se aaye ga

Source module / event	Rule - kya read karna hai
Sales lines	Posted completed service/package/product net revenue and refund reversals.
Stock costs	Retail product COGS, salon consumption and approved write-off movements.
Payroll/commission	Finalized salaries and earned commission after reversals.
Expense vouchers	Recognized operating overhead costs.
Prior period	Identical source calculations for prior comparative range.
Detailed Income / Expense reports	Same canonical recognized revenue and expense events, same branch/time cutoff and status policy.

4. Required fields aur top filters

Table fields:* P&L Line | Section | Current Period (PKR) | % of Net Revenue | Prior Period (PKR) | Variance / Growth

Top filters:* Branch | Date Preset | From/To | P&L / Detailed Ledger | Optional Category / Cost Center

5. Sahi accounting formulas

Net Revenue

Service Net + Package Net + Retail Net - Revenue Refunds/Reversals (no tax/tips).

Cost of Sales

Retail Product COGS + Salon Consumable Usage (consistent classification).

Gross Contribution

Net Revenue - Cost of Sales.

Operating Overheads

Finalized Salary + Net Earned Commission + Operating Expense Vouchers + Approved Shrinkage/Write-offs (+ other properly classified overhead).

Net Operating Profit

Gross Contribution - Operating Overheads.

Growth %

(Current - Prior) / ABS(Prior) × 100; if Prior = 0 show N/A.

6. Step-by-step transaction flow

- 1. Invoice performed/posted -> valid revenue and staff commission liability.
- 2. Stock out creates COGS/consumption, not supplier payment.
- 3. Expenses and payroll recognized when incurred/finalized.
- 4. Operating profit calculates from flows in one period and branch.
- 5. Prior period recomputed on identical definitions, reversals and accounting cutoffs.

7. Accounting events - income, expense aur cash alag

Conceptual posting view; actual ledger implementation mein linked Debit/Credit entries aur appropriate liability/asset accounts use hon.

Event	First impact	Second impact
Net service/product sale	Revenue recognized once	Tax/Tip liabilities separate
Product stock sold	COGS recognized	Inventory reduced
Payroll/commission earned	Operating expense recognized	Liability recognized; payout does not duplicate

8. Example - sirf samajhne ke liye

Example PKR values testing ke liye hain; current production database ya screenshot ke verified amounts nahi.

Example Item	Amount / Result
Net Revenue	10,000
Retail COGS	- 1,000
Salon Consumption	- 500

Example Item	Amount / Result
Gross Contribution	8,500
Salary Expense	- 2,000
Commission Earned	- 500
Other Expenses	- 1,000
Operating Profit	5,000

9. Doosri reports se cross-check

- P&L Net Revenue = Sales & Invoices / Income Expense recognized basis.
- COGS = Inventory costs; commission = Commission; salary = Payroll; overhead = Expense sources.
- Operating Profit not equal net cash collections or drawer closing.
- Detailed ledger events unique across all sources; no double cost postings.
- Detailed Income subtotal = P&L revenue. Detailed Expenses posted overhead = matching P&L overhead voucher categories; payroll/commission/cost components from dedicated sources.

10. Portal access aur security

Super Admin all permitted branches, Admin branch scope, Accountant only if finance P&L permission; no editing source transactions from report.

11. Developer tests - kab sahi mana jaye

- Test 1: 10,000-1,500=8,500 gross; 8,500-3,500=5,000 operating profit.
- Test 2: Unpaid sale may increase profit but not physical cash.
- Test 3: Tax/tips added to invoice do not increase P&L revenue.
- Test 4: Refund properly reverses net sale/commission and cost according to policy.

12. Saari reports par same accounting rules

- Posted row ke saath unique Source ID, Branch ID, actual user, date/time, status aur reversal reference hona zaroori hai.
- Valid transaction ko hard delete mat karein; linked reversal/refund se negative effect aur audit history maintain karein.
- Tax aur tips liability hain - Revenue/Operating Profit/Staff Commission base nahi.
- User Cash, Named Bank/Online Accounts, Revenue, Expense, Receivable, Payable aur Settlement alag ledgers/concepts hain.
- Report totals screen/CSV/PDF/Print sab par same filters aur same cutoff se match karein.
- Super Admin authorized all branches; Admin assigned branch; cashier/accountant own cash; settlement self-approval prohibited.

13. Final developer instruction

Existing SalonOS ki blue/white clean UI preserve karo. Report ko read-only rakho. Posting source module mein hi karo. Filters screen, CSV, PDF aur Print par identical apply karo. Har movement source reference, actor, branch, date-time, status aur original reversal se traceable ho. Frontend mock tests ke baad backend/database posting aur RBAC separately verify karo.

Scope: 14 requested PDF reports only. Petty Cash ka naya module nahi. Actual IFRS company Balance Sheet is package mein nahi - user-wise My Cash Balance Sheet hi required hai.
